

Smart Data Analyzer

A GUI-based desktop application built with Python that enables business users to analyze Excel and CSV data without writing code.

Features

- Import Excel and CSV files
- Automatic detection of text and numeric columns
- Dataset summary:
 - Total rows
 - Total columns
 - Column names
- Dynamic GroupBy reporting
- Aggregations:
 - Sum
 - Average
 - Count
 - Max
 - Min
 - Median
- Interactive chart generation:
 - Bar Chart
 - Column Chart
 - Line Chart
 - Pie Chart
- Export reports to Excel or CSV
- Export charts as PNG

Technologies Used

- Python
- Pandas
- Tkinter
- Matplotlib
- OpenPyXL

Installation

```
pip install -r requirements.txt
```

Run

```
python smart_data_analyzer.py
```
